NTPC SCHOOL OF BUSINESS

VYAPTI, VOL 6 ISSUE 10

Interaction of Governance Committee Chairperson, NSB & Executive Director, PMI, NTPC, Ms Premlata, with NTPC School of Business faculty and staff

The NTPC School of Business (NSB), Noida, welcomed Ms Premlata, Chairperson of the Governance Committee, NSB & Executive Director, PMI, NTPC, for an interaction with faculty and staff on 15 September 2026. Her interactions with faculty and staff consolidated aspirations and inspired fond hope for the School's way ahead. The Chairperson commenced deliberations by drawing attention to unique facets of NSB as a centre of higher learning. She emphasised that NTPC, as India's leading power-sector organisation, recognised the need for high-quality management education to strengthen and sustain technical and managerial capabilities in the energy domain. This vision led to the establishment of NSB as an institution dedicated to developing competent professionals and future leaders for the sector.

Her observations reaffirmed the importance of preserving NSB's unique institutional identity while expanding its academic and research contributions. By aligning its programmes with emerging energy-sector challenges, promoting industry–academia collaboration, and nurturing globally competent professionals, NSB can further strengthen its position as a specialised institution for management education and executive development. The interaction encouraged the NSB community to build on its existing strengths and pursue a future-oriented vision of institutional excellence.

NTPC School of Business (NSB) Conducted Two Batches of Capacity Building Programme on Policy and Regulatory Aspects of Electricity Distribution for DISCOM Officials

NTPC School of Business (NSB) conducted two batches of a Capacity Building Programme on Policy and Regulatory Aspects of Electricity Distribution for officials of Distribution Companies (DISCOMs) under Part-B of the Revamped Distribution Sector Scheme (RDSS), Ministry of Power, Government of India, during 9-11 Sept 2026 and 23-25 Sep 2026. The first batch of September 2026 trained 25 Participants from MGVCL, Gujarat, PGVCL, Gujarat, "WBSEDCL, West Bengal", JVVNL, Jodhpur, and the second batch included 28 trainees from MGVCL, Gujarat, PGVCL, Gujarat, WBSEDCL, West Bengal, JVVNL, Jodhpur and PSPCL Punjab.

NTPC School of Business (NSB) Conducted Two Batches of Capacity Building Programme on Policy and Regulatory Aspects of Electricity Distribution for DISCOM Officials

The project was successfully secured through Open Competitive Bidding and is led by Dr Brijesh Bhatt. Under the project, NSB has been empanelled to conduct programmes in two key areas: Policy and Regulatory Aspects of Electricity Distribution and Financial Aspects of Electricity Distribution, aimed at strengthening the knowledge and capabilities of officials from Distribution Companies (DISCOMs) and State Electricity Regulatory Commissions (SERCs). The project envisages conducting 20 programmes, with an outreach target of approximately 500 officials from DISCOMs and SERCs. Through this project, NSB continues to contribute to professional development and capacity building in the power sector.

NTPC School of Business (NSB) Conducted Two Batches of Capacity Building Programme on Policy and Regulatory Aspects of Electricity Distribution for DISCOM Officials

The programme covers key areas such as electricity laws and policies, the regulatory framework, tariff determination, power purchase management, distribution reforms, financial sustainability, loss reduction, consumer service delivery, and emerging challenges in the electricity sector. It also focuses on the implementation of government initiatives, regulatory compliance, operational efficiency, and the adoption of best practices for improving the performance of DISCOMs. Through expert-led sessions, interactive discussions, case-based learning, and experience sharing, participants gain practical insights into addressing sector-specific challenges and implementing effective solutions in their respective organizations.

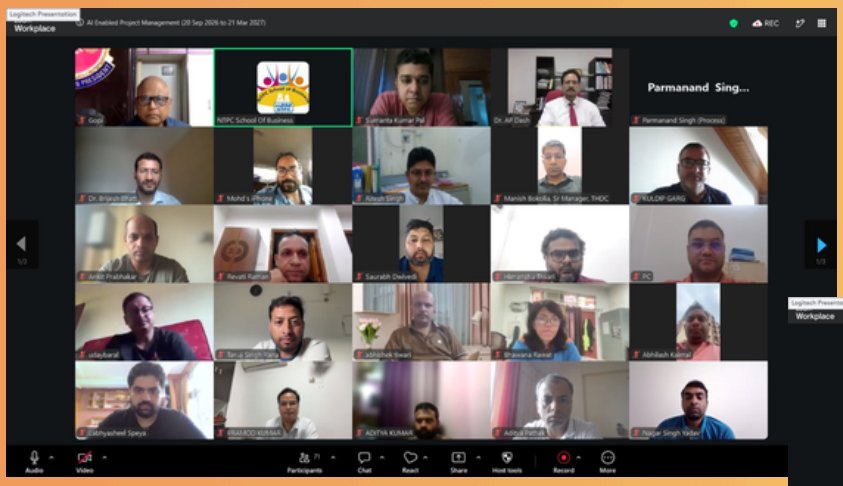

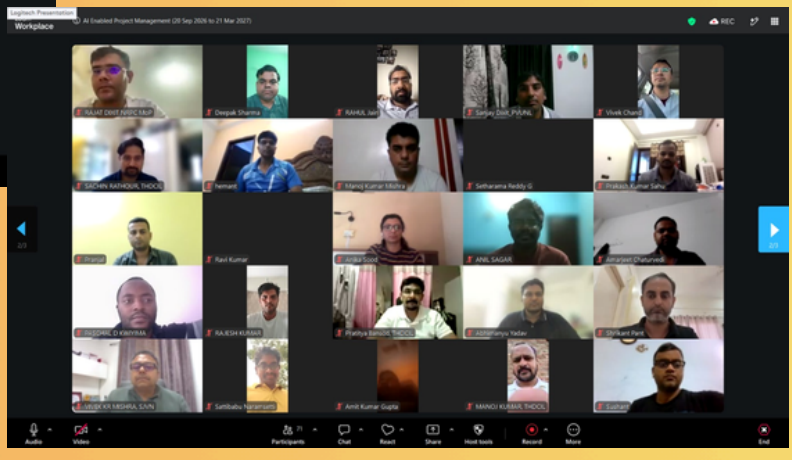

NSB launched a six-month Certificate Program on AI-Enabled Project Management Programme

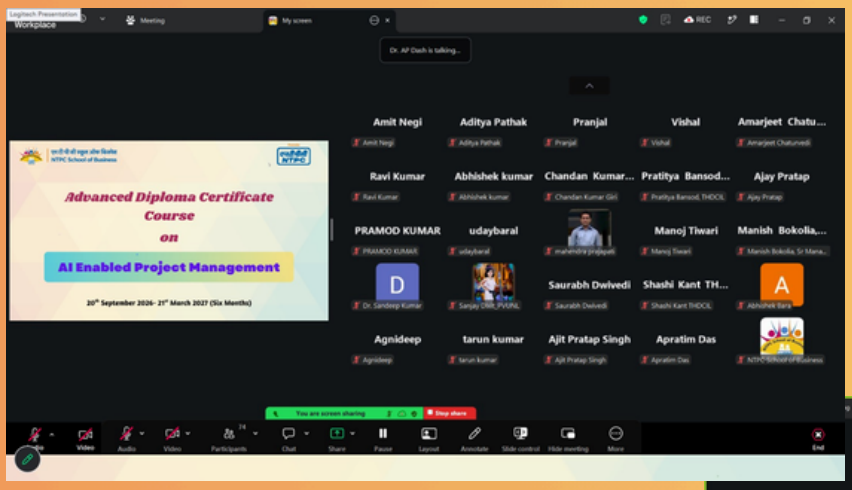

NTPC School of Business (NSB) launched a six-month Certificate Program on AI-Enabled Project Management Programme. The AI-Enabled Project Management Programme is designed to strengthen participants' understanding of how Artificial Intelligence (AI) is applied in modern project management, with a particular focus on improving project planning, execution, monitoring, risk management, and decision-making in the power and infrastructure sectors. The programme brought together 84 participants representing a diverse range of public sector enterprises, power utilities, government organisations, and private infrastructure companies, providing a valuable platform for cross-organisational learning and knowledge exchange. The participating organisations included PVUNL, Patratu; TANESCO, Tanzania; NRPC, CEA; Damodar Valley Corporation (DVC); NTPC; SJVN; NHPC; THDC; Hindustan Urvarak & Rasayan Limited (HURL); NEEPCO; NTPC Green Energy Limited (NGEL); NML; and private sector organisations such as Abir Infrastructure Private Limited, BOMS Private Limited, Greenew Urja Limited, and Jhariya Ananturja Private Limited. The participation of professionals from TANESCO, Tanzania, also added an international dimension to the programme.

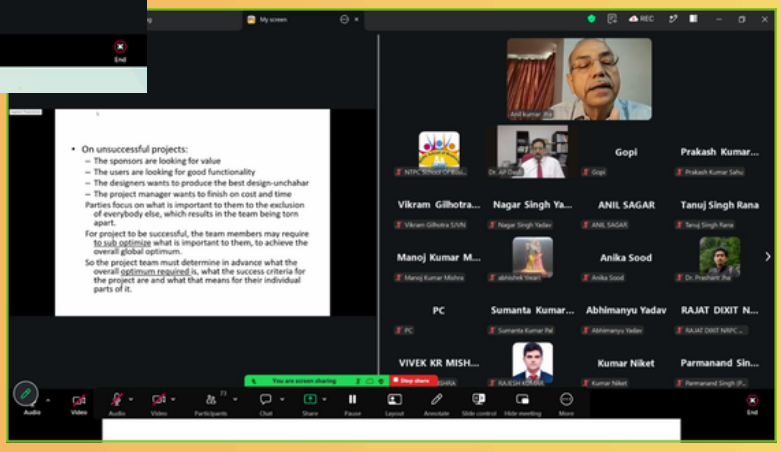

NSB launched a six-month Certificate Program on AI-Enabled Project Management Programme

The programme aims to familiarise participants with emerging AI technologies and their potential to transform traditional project management practices. Key areas of learning include the use of AI-enabled tools for project scheduling, resource optimisation, cost estimation, progress tracking, predictive analytics, risk identification, and timely decision-making. Emphasis will also be placed on understanding how data-driven insights and intelligent automation can help project managers anticipate potential delays, improve resource utilisation, strengthen coordination among stakeholders, and enhance overall project performance. The programme also provides an opportunity to discuss practical challenges associated with adopting AI in complex projects, including data quality, technology integration, organisational readiness, and responsible use of AI. By bringing together professionals from the power generation, transmission, infrastructure, energy, and allied sectors, the programme encourages the exchange of industry experiences and best practices.

Delegation from Financial University Moscow, Russia Visits NTPC School of Business (NSB)

A delegation from Financial University, Moscow, visited the NTPC School of Business (NSB), Noida, on 8 September 2026. The visit provided an opportunity to strengthen academic interaction and foster international collaboration between the two institutions. During the visit, the delegation interacted with NSB faculty members and staff, exchanging perspectives on academic practices and institutional initiatives. The delegates also engaged with students of the PGDM (Executive) programme, facilitating meaningful discussions and cross-cultural learning. The interaction offered valuable exposure to international academic perspectives and highlighted the importance of building global partnerships to

Dr R. Goichandran chaired a session at the 3rd Edition of the Pre-COP Consultation

Dr. R. Goichandran chaired a session at the 3rd Edition of the Pre-COP Consultation, organized by the Madhya Pradesh Council of Science & Technology, Department of Science & Technology, Government of Madhya Pradesh. This was on the 1st of October 2026.

The Pre-COP 31 Consultation was organized by MPCoST in collaboration with Madhya Pradesh Rajya Niti Aayog, Atal Bihari Vajpayee Institute of Good Governance and Policy Analysis (AIGGPA) and others to discuss prospects and priorities for the coming COP 31.

The sesion he chaired was about State's role in achieving the National commitments vis -s vis financing. Other panelists were from EPTRI, IIFM , the Chhattisgarh State department dealing with climate action and the ICLEI.

NSB Faculty, Dr Shiv Ratan Agrawal Research Publication

Agrawal, Shiv Ratan and Mittal, Divya (2026) 'Customer Sentiments on Neobanking', International Journal of Electronic Marketing and Retailing, Inderscience Publishers, Vol. 18, No. 4, pp.522–540 (ABDC-C/Q3/Scopus).

Abstract of the Study

The present study tries to explore customer sentiments toward neobanking empirically, which is lacking in the extant literature as it is a recent FinTech innovation. We extracted positive and negative sentiments as well as the emotions associated with them from 2,167 comments on 35 videos about neobanking on YouTube. To estimate the explanatory power of all sentiments on the 'like' option, we employed NB2 analysis. The study found that all pleasant customer sentiments about neobanking on YouTube significantly and positively influence viewers to like them, except for anticipation. However, the study reported that unpleasant customer sentiments about neobanking partially influence viewers to like them. In particular, unpleasant sentiments such as sadness, fear, and disgust were not found to be significant in influencing viewers. The identified pleasant and unpleasant emotions about neobanking should be further explored with larger datasets. This study is a pioneering systematic empirical work on neobanking to guide bankers and academics around the world.

NSB Faculty Dr. Sandeep Kumar Delivers Invited Expert Session at MMTTC, IIT Mandi

Dr. Sandeep Kumar, Assistant Professor at the NTPC School of Business (NSB), Noida, delivered an invited expert session as part of the Faculty Development Programme (FDP) titled "Advanced Semiconductor Materials and Device Technologies", organized by the Malaviya Mission Teacher Training Centre (MMTTC), IIT Mandi, on 22 September 2026 in online mode.

During the session, Dr. Kumar discussed the significance and applications of near-infrared (NIR) photodetectors, highlighting their growing importance in areas such as energy efficiency, energy security, defence, and national security. He explained the two-step epitaxial growth of germanium (Ge) on silicon (Si) substrates and discussed key aspects of device performance, providing participants with insights into the challenges and opportunities associated with advanced semiconductor devices.

Dr. Kumar also briefly discussed flexible solar cells and their potential for niche applications, particularly their integration into building-integrated photovoltaic (BIPV) systems, where flexible and lightweight solar technologies can offer advantages in applications with architectural and structural constraints.

The session was attended by more than 100 participants from across India, including students, researchers, faculty members, and professionals. The expert session provided valuable insights into emerging materials and device technologies at the intersection of semiconductors, optoelectronics, energy efficiency, and renewable energy.

NSB Faculty, Dr Alka Rai reviewed the research report titled “Employment Trends in Green Jobs” as a member of the Research Advisory Group, VVGNLI

Dr Alka Rai, faculty at the NTPC School of Business (NSB), Noida, served as a member of the Research Advisory Group (RAG) of the Centre for Agrarian Relations, Rural and Behavioural Studies, V.V. Giri National Labour Institute (VVGNLI), Noida. Being part of RAG, Dr Alka Rai reviewed the research report titled “Employment Trends in Green Jobs” prepared from the study conducted by VVGNLI Noida.

The review meeting provided a platform for academic deliberations, critical review, and expert recommendations to strengthen the report’s quality and relevance to emerging employment trends and labour market developments in the green economy.

NSB Students Club Activity

The student club of OJAS / SAMVAAD at NSB organised an activity under the theme "Connect, Create & Celebrate," coordinated by Dr Prashant Jha. The activity aimed to foster interpersonal connections, encourage creative expression, strengthen teamwork, and enhance participants' communication and presentation skills through interactive and experiential learning activities.

The session began with "The Story Behind the Person," an individual reflection and group-sharing activity. Participants selected an object, experience, or memorable moment representing their professional journey and shared its significance through short stories. This encouraged meaningful conversations and helped participants understand one another beyond conventional introductions.

NSB Students Club Activity

Following a 30-minute break, participants took part in "Build the NSB Brand in 15 Minutes," a team-based creativity challenge. Working in groups of five to six, participants developed promotional campaigns highlighting why working professionals should choose NSB. Each team created a tagline, a short video or reel concept, a poster or social-media creative, three reasons to choose the programme, and a memorable hashtag. The ideas were evaluated on originality, clarity of message, relevance to working professionals, emotional appeal, and presentation.

The programme also featured "Pitch & Perform," where teams presented their brand campaigns alongside creative performances. Formats included skits, parody advertisements, mock interviews, news bulletins, and student-life representations, allowing participants to combine persuasive communication with cultural expression

NTPC School of Business organized field visits for participants of "Advanced Certificate Course on Renewable Energy and Management Systems for Armed Forces personnel"

NTPC School of Business (NSB) is conducting the six-month Advanced Certificate Course on Renewable Energy and Management Systems for Armed Forces personnel. The programme has been carefully designed to provide participants with a comprehensive understanding of the rapidly evolving renewable energy sector while strengthening their managerial and technical capabilities.

NTPC School of Business organized field visits for participants of "Advanced Certificate Course on Renewable Energy and Management Systems for Armed Forces personnel"

As part of the course curriculum, various field visits have been organised to provide participants with experiential learning and practical industry exposure. These visits include the Indian Energy Exchange (IEX), NTPC Power Management Institute (PMI), NTPC Energy Technology Research Alliance (NETRA), and NTPC Dadri. These engagements help participants connect theoretical concepts with real-world industry practices, technologies, and operational processes.
